

Dynamic Web

Fall 2019

Things to Cover Today

1. Hook up Firebase for Auth
2. Setup Routing and Redirect for User State
3. Setup Functions for Sign Up, Log In, and Log Out
4. Hook up Forms to Functions
5. Check to see if User is signed in

Things to Cover Next Class

To close out Exercise 5:

- We will get User Information from Firebase
- We will work on finishing Exercise 5 and the rest of the classes will be final project time.

Note

As we close out the semester and have limited time, this class may go quickly - make sure to pay attention.
